

Lamp replacement for 8" NightOrbs™

NightOrbs™ use 20-watt state-of-the-art Xelogen lamps, which have an average life span of 20,000 hours, depending on bulb wattage. To replace the lamp:

1. Remove the NightOrb™ by loosening the set screw in part B of the base. (Use allen wrench provided 1/8".)
2. Grasp and hold the base with one hand, and with the other hand, hold the stem and anchor down. Now pull and twist the base and orb upwards to reveal Xelogen lamp.
3. With NightOrb™ removed, replace the lamp and then reattach the NightOrb™.
4. The NightOrb™ is now ready to be plugged back into service.
